

## Shelley Testimony

Take a look at the photos you will see the huge lump on my right shoulder prior to Digilite treatment even look at my waist difference after treatment how the lumps and swelling went down in just a 30 min treatment.

I had a massive migraine and spinal pain episode yesterday that landed me in bed all day and that lumps and swelling is what my back looked like along my spine when I describe my spine as being on fire all the time.

The lump on my shoulders looked like a bone was out but it wasn't in 10 minutes of treatment the pressure inside my head from the migraine immediately eased where no meds touched it. Tonight I have energy and after the treatment was able to have a good rest I still need another treatment for the spine pain but it is down from a level 80 down to a 20 and I am no longer in a head fog as well can see clearer again and not forgetting possessions at friends or where I am due to pain. Besides requiring a belt to hold my pants on once again as I have a waist and don't look like a Sumo wrestler.

I cannot wait to get my own digilite!
